TMLP Residential Solar Rebate Program

(04/26/2024) - For 14 years, since 2010, the TMLP has offered a Residential Solar Rebate program to provide financial incentives to our residential customers who choose to install a photovoltaic array on the residential property they own. Due to the success of our program and other financial incentives that became available, our circuits are becoming saturated thus limiting our infrastructure and operations. As a result, we have begun to deny interconnection projects to the TMLP grid.

We still will continue to offer a net metering if there is enough space on the customer specific circuit. We have posted the street listing on the website and as circuits become full we update accordingly.

This will be effective for all new applications received after 4:30 on May 31, 2024.

We appreciate your understanding and information about our other programs can be found on our website, www.tmlp.com/go-green.

TMLP serves over 39,000 customers in Taunton, Raynham, Berkley, North Dighton and sections of Lakeville and Bridgewater. Our mission is to provide reliable, competitively priced services to our community in a sustainable, environmentally-sensitive and customer-centric manner. www.tmlp.com
